

MEMRISTORS: Sentence-wise writing and editing

Type every sentence on a separate line.

Leave a blank line for each paragraph break.

Audit each sentence by asking these questions:

1. What is the precise **Meaning** of this written sentence?
2. Can I just **Erase** this entire sentence?
3. How will readers **Misinterpret** this sentence?
4. Does this sentence claim anything that requires **References**?
5. Is this sentence **Irrefutable**? Is it *definitely* completely true?
6. Will it be clearer if I **Split** this sentence into shorter sentences?
7. Can I **Trim Out** worthless words from this sentence?
8. **Recite** the sentence *out loud* to identify grammatical errors.
9. Are there **Spelling** errors in this sentence?

In markdown, each block of sentences becomes a paragraph and each blank line becomes a paragraph break.
